

WHO WE ARE

We are a software defined, cognitive mobile wireless networking company . Our software platform enables the Internet of moving things and people. The cloud managed platform powers artificial intelligence for combining dynamic HetNet mobile networking and computing.

We are located in New Jersey, USA.

**COMBINING COGNITIVE
MOBILE NETWORKING &
COMPUTING**

SPECTRONN

AI POWERED WIRELESS

Our solutions combine artificial intelligence (AI), wireless networking and mobile computing for Internet of mobile things and people.

OUR SOLUTIONS

COGNITIVE HetNet

Dynamic spectrum access & management for mobile heterogeneous networking (HetNet). Exploiting multi-path networking.

SOFTWARE DEFINED ARCHITECTURE

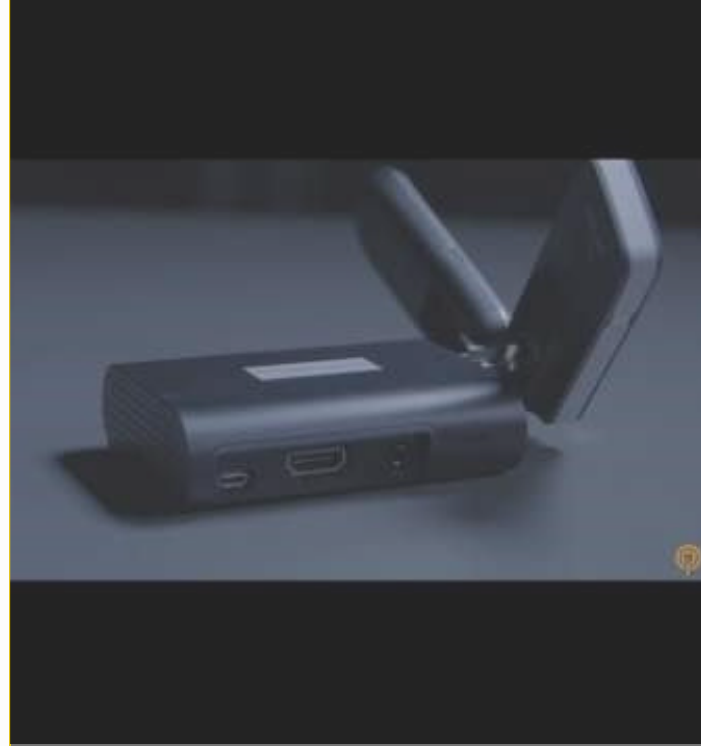

Software defined access (SDA) platform extends software defined networking (SDN) up to mobile client/UE devices. Combines deep learning with mobile Internet.

APPLICATION AWARENESS

Application (App) aware SDA architecture supports per-App wireless bandwidth and security policies.

DATA ANALYTICS

Advanced data analytics provides end-to-end situational awareness about devices, spectrum, networks, applications and people.

VISION & MISSION

OUR VISION

Self-driving mobile Internet.

OUR MISSION

Embed deep artificial intelligence into mobile wireless networking and computing.

**SELF-DRIVING MOBILE
INTERNET OF THINGS &
PEOPLE**
